

Fund update

SIL Mutual Fund Personal Lump Sum Scheme

SIL New Zealand Share Fund

Year ending 30 June 2026

This fund update was first made publicly available on: 30 September 2026

What is the purpose of this update?

This document tells you how the SIL New Zealand Share Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Superannuation Investments Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Mercer (N.Z.) Ltd was appointed by Superannuation Investments Limited to provide administration, investment management and related services to the scheme from 2 March 2026.

Description of this fund

The SIL New Zealand Share Fund invests mainly in Trans-Tasman equities. Investments may include equities in companies that are listed or intend to list on the New Zealand or Australian stock exchanges, and cash and cash equivalents.

The SIL New Share Fund aims to achieve a return (after the fund charge and before tax) that is above the relevant market index over periods of one-year or greater.

Total value of the fund	\$17,037,616
Number of members in the fund	524
The date the fund started	31 March 1992

What are the risks of investing?

Risk indicator for the SIL New Zealand Share Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.silfunds.co.nz/riskquiz.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 June 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

Specific risks which relate to Mercer's particular approach to management of the funds' investments are summarised as follows:

Manager of managers: Mercer is a "manager of managers" and therefore there is the risk that a manager we select underperforms, resulting in lower returns than the relevant market or objective. To reduce this risk, we have a thorough manager research and monitoring process, and we also diversify across a number of managers.

How has the fund performed?

	Average over past 5 years	Past year
Annual return <i>(after deductions for charges and tax)</i>	0.81%	7.14%
Annual return <i>(after deductions for charges but before tax)</i>	1.54%	7.79%
Market index annual return <i>(reflects no deductions for charges and tax)</i>	2.57%	10.45%

The market index annual return shows the return of the S&P/NZX50 Gross Index (with imputation credits re-invested).

Additional information about the market index is available in the Statement of Investment Policy and Objectives on the scheme register at www.disclose-register.companiesoffice.govt.nz.

This shows the return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 30 June 2026.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the SIL New Zealand Share Fund are charged fund charges. In the year to 30 June 2026 these were:

	% of net asset value
Total fund charges¹	0.89%
Which are made up of:	
Total management and administration charges	0.89%
Including:	
Manager's basic fee	0.79%
Other management and administration charges	0.10%
Total performance-based fees	0.00%

Investors are not currently charged individual action fees for specific actions or decisions (for example, for withdrawing from the fund).

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Sarah had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Sarah received a return after fund charges were deducted of \$714.00 (that is 7.14% of her initial \$10,000). Sarah did not pay any other charges. This gives Sarah a total return after tax of \$714.00 for the year.
